I worked with James. He was stuck with me in the training phase, and had the daunting task of teaching me the ropes of the job. He was a very wise and patient man. When we had a few minutes to just talk about something other than work he would rave about his family. He told me about picking up his grandkids. I did not get a chance to know him as much as I would have liked to. From the things I have seen and heard he has had a good impact on everyone's life that he had the chance to come in contact with. You may be with the Lord now, and everytime I walk into a Target, or Home Depot I will think of you .
